

## Mini Project – 2 A Web Based Business Model

**PROJECT NAME**

# BLOGSITE

***2 A Web Based  
Business Model***

***(SEMESTER V)***

***submitted in  
partial fulfillment of requirement for the award  
of degree of***

**Bachelor of Engineering**

**in  
Information Technology**

***By***

**Hodekar Abdul Ahad Parwez (T-20-0299)  
Gawas Shriniket Kishor (T-20-0352)**

***Guided by***

**Prof. Amar Palwankar**

**Department of Information Technology  
Finolex Academy of Management and Technology, Ratnagiri**

**ACADEMIC YEAR 2022-23**

## **Declaration**

We, hereby declare that, the Mini Project titled “ **BLOGSITE** ” submitted herein has been carried out by us in the Department of Information Technology at Finolex Academy of Management and Technology, Ratnagiri.

**Name of the students:-**

1. Hodekar Abdul Ahad Parwez (T-20-0299)
2. Gawas Shriniket Kishor (T-20-0352)

Date:1/11/2022

## **Certificate**

The Mini Project titled **"Blogsite"** is submitted by **"Hodekar Abdul Ahad Parwez"**, **"Gawas Shriniket Kishor"** in the completion of SE Bachelor in Information Technology, has been carried out under my supervision at the Department of Information Technology at Finolex Academy of Management and Technology, Ratnagiri .The work is comprehensive, complete and fit for evaluation.

**Prof. Amar R Palwankar**

Assistant Professor,

Department of Information Technology,  
FAMT, Ratnagiri

CHAPTER 9 : REFERENCES	24

## **CHAPTER 1 INTRODUCTION**

Blogs are alternatively called web logs or weblogs which is a Web site that consists of a series of entries arranged in reverse chronological order, often updated on frequently with new information about particular topics. The blogs are designed to be very easy to add new entries to, so the information on blogs is updated much more frequently than a traditional site. Blogging is changing the way we think about news and opinion, and it is moving eyeballs away from established news sites and toward upstarts. Most popular blogs were created by writers who wanted to share what they knew.

Blogs allow readers to leave their own comments or links to topics and other Web sites relevant to the entry or the blog's topical focus. Typically, this interactive nature allows bloggers to refer to each other's blogs, creating so called "blogospheres", a term used to describe the millions of interconnected blogs on the Internet. The blogosphere is a way of describing the social creature that grows from a critical mass of blogs. A blogger is a person who manages and posts entries on blog and there are a number of different types of bloggers; personal bloggers, photo bloggers, and corporate bloggers are a few types, among many others.

The main purpose of the Project on Online Blogging System is to manage the details of Blogs, Idea, Topic, Entries, Views. It manages all the information about Blogs, Content, Views, Blogs. The project is totally built at administrative end and thus only the administrator is guaranteed the access. The purpose of the Blogs, Idea, Content, Topic. It tracks all the details about the Topics, Entries, Views.

## **LITERATURE REVIEW**

This application is to provide a hassle-free accessing of the posted blogs, entries, topics etc. It also used for posting the blogs, editing the blogs, deleting the posted blogs etc. It is also used for viewing and posting the others one's blogs/posts. Every organization, whether big or small, has challenges to overcome and managing the information of Idea, Blogs, Entries, Content, Views.

This project is a review of Top Blogging Platforms and aims to find out the reasons that made them successful blogging platforms and taking the top places among other blogging platforms. There are many competing blogging platforms on the market and a survey of top 2500 blogs by their usage of blogging platforms, the results indicated the design & customization, social media sharing, ease of use, community, cost, installation, functionality, features, e-commerce, languages, publishing method and support of those blogging platforms were positively related to usage. There is also detailed comparison was conducted in their general features and functionalities. The intention of this article is to provide insights for people to choose better blogging platform to make blog.

## **SOFTWARE AND HARDWARE REQUIREMENTS**

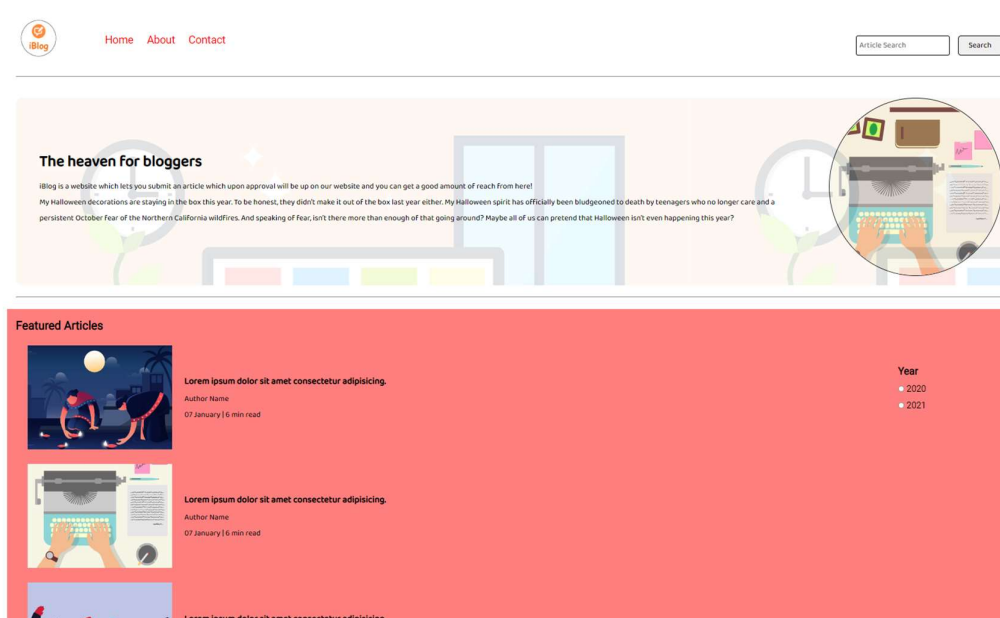

### **SOFTWARE REQUIREMENTS**

<b>Code Editor</b>	Visual Studio Code v1.7
<b>Web browser</b>	Chrome, Firefox, Safari (Mac), Opera, and Edge, etc.
<b>Graphics Editor</b>	Photoshop, GIMP

### **HARDWARE REQUIREMENTS**

<b>Operating system</b>	Windows XP or Higher
<b>CPU</b>	pentium processor at 90 MHz or higher
<b>Memory</b>	500 MB RAM or higher
<b>Free space</b>	80 MB available
<b>Graphics hardware</b>	DirectX 3.0 or higher

In communications and information processing, code is a system of rules to convert information—such as a letter, word, sound, image, or gesture—into another form, sometimes shortened or secret, for communication through a communication channel or storage in a storage medium. An early example is the invention of language, which enabled a person, through speech, to communicate what they thought, saw, heard or felt to others. But speech limits the range of communication to the distance a voice can carry, and limits the audience to those present when the speech is uttered. The invention of writing, which converted spoken language into visual symbols, extended the range of communication across space and time.

The process of encoding converts information from a source into symbols for communication or storage. Decoding is the reverse process, converting code symbols back into a form that the recipient understands, such as English or/and Spanish.

One reason for coding is to enable communication in places where ordinary plain language, spoken or written, is difficult or impossible. For example, semaphore, where the configuration of flags held by a signaler or the arms of a semaphore tower encodes parts of the message, typically individual letters and numbers. Another person standing a great distance away can interpret the flags and reproduce the words sent.

## **CONCLUSION**

In summary, Blogsites are increasingly accurate and useful, and their benefits extend widely across the economy. While much has been accomplished in improving blogging buisness, there remains much room for improvement. The forecasting community is working closely with multiple stakeholders to ensure that bloggers and blog readers meet their specific needs. Simultaneously, they are developing new technologies and observational networks that can enhance an individuals skill and the value of their services to their users.
